SCIENCE OF TSUNAMI HAZARDS (Also found at the Tsunami Society present website) Wed, 13 Feb 2019 18:43:00 GMT Numerical Modeling of Water Waves - Dr. George PC - One aspect of the compressibility of the fluid in the SPH model is that there are sound waves within the fluid domain. While the speed of sound has been slowed in the model, the generation of acoustic-like waves by breaking waves still occurs. Fig. 3 shows the time history of fluid pressure as measured by at a point within the surf zone. Three breaking events are clearly shown.
